BULB & DAHLIA FARMS

ROUTE 2, BOX 340

KENT, WASHINGTON

**Select Dahlia
and Bulb List**

BEVERLEY BULB AND DAHLIA FARMS

CHOICE DAHLIAS AND BULBS

We cannot think of any flower which fulfills so many of the desirable qualities sought after and actually found in the Dahlia. A few of these qualities are: Its willingness to grow under varying conditions of soil and climate. Very few, if any,

plants exceed it in length of blooming season. None produces as many blooms on a single plant, in as many different forms, or as great a variety of color or combination of colors in one flower. AND SIZE: Ranging from the one-inch Pompon to the giant Exhibition Dahlias of 15 inches or more. And did you know that individual new varieties may be grown from seed, and flower profusely in one season.

We are located in the heart of the White River Valley approximately 18 miles from the business center of Seattle and its temperate salt air and flanked on the southwest by the Cascade range and majestic Mount Rainier which seems to be watching over our activities. This valley is one of the most productive in the world, famous for its bulbs, berries and truck garden crops.

In shipping you nothing but the choicest and healthiest of Dahlias and bulbs we hope to achieve mutual success as flower growers. We welcome visitors at all times to our gardens.

Our Nurseries are located in the heart of the productive Kent Valley. Follow the West Valley Highway, also known as Old Tacoma Highway, through Renton Junction and Orilla to O'Brien Corner, turn west three-quarters of a mile, then south one mile, on east side of Green River.

IMPORTANT

We are very sincere in desiring that you get the very best results from growing our Dahlia stock, which is thoroughly inspected and each root guaranteed to have at least one live eye when leaving our hands. In order to establish friendly relations and hold your confidence we would like to make the following suggestions on how to handle your order when it is received: Open the parcel as soon as received to check for any damage or deterioration in transit. For best results they should be planted immediately, if practical, considering weather conditions, etc. If impossible to plant when received better leave them in storage medium in which they were shipped and be careful not to put them in too hot or dry a place where they are likely to shrivel and dry up—or the other extreme, too cold and damp, the possibility of freezing or absorbing a fungus condition which leads to rot. We do not advise soaking in water or too wet a medium of any kind to force the eye into sprouting; this only leads to trouble. Finally, check your soil for wire worms and cut worms; a wire worm can eat the eye right out of the tuber, eliminating any possibility of producing a plant. Consult your garden insecticide dealer for one of the new products which contains benzene hexachloride and use as directed for a control of wire worms and other pests living in the soil.

General Information

(Please Read Carefully Before Placing Order)

PLEASE ORDER EARLY—Be sure to state in your order approximate date you wish shipment to be made. We do not advise shipment of Dahlia roots east of the Pacific slope before proper planting time in your area because of the possibility of damage from freezing in transit. However, should you desire shipment prior to April 1 we will pack as frost proof as possible and ship Express at purchaser's risk and expense.

SUBSTITUTIONS—May we suggest that you allow us to substitute varieties of the same general color and of greater value in the event that shortages exist in some varieties. Please indicate YES or NO in your order.

TERMS—Due to increased transportation costs we would rather not accept orders for prepaid postage for less than \$3.00. Less than this amount please add 10% to your remittance. Terms: Cash is required with order. Please, no C.O.D. orders accepted. They are most costly for both of us. Please remit by check, money order, or cash by registered mail only. Washington residents—be sure to include sales tax with your remittance.

DISCOUNTS—Due to the high cost of transportation and possibility of going even higher, we have discontinued giving discounts, allowing us to maintain our reasonable prices on stock and lowering them on a number of varieties, and still prepay shipments at retail.

GUARANTEE—All stock shipped by us is guaranteed to be true to name, healthy and in good growing condition upon arrival at destination. Stock not meeting these conditions will be replaced if returned to us within three weeks after arrival. Since we cannot control conditions under which stock, once sold, is planted and grown, our responsibility is limited to replacement or refunding of purchase price of merchandise returned.

Dahlia roots only are listed for sale in this catalog. This underground reproductive growth of the Dahlia is quite often referred to by the public as bulbs, or tubers; however, they are actually roots, the term used almost universally in the trade. Any reference made to salable Dahlia stock in this catalog means a division of the root system of the Dahlia plant.

LOCATION—Our Nurseries are located in the heart of the productive Kent Valley. Follow the West Valley Highway, also known as Old Tacoma Highway, through Renton Junction and Orilla to O'Brien Corner, turn west three-quarters of a mile then south one mile, on east side of Green River.

ATTENTION, RESIDENTS OF THE PACIFIC NORTHWEST

We are also growers of perennial plants, growing many species and varieties of this type of nursery stock. If interested in enhancing the appearance of your rockery and landscaping, we are the folks who can help you. Here is a partial list of the perennials which we grow extensively, plus numerous varieties of each specie: Alyssum, Aquilegia, Hardy Aster, Astilbe, Campanula, Daisy, Delphinium, Dianthus, Bleeding Heart, Gaillardia, Geum, Gypsophila, Helianthemum, Coral Bell, Iberis, Iris, Lupine, Penstemon, Phlox, numerous types of Primroses, Pyrethrum, Saxifraga, Scabiosa, Trollius, Veronica, and Viola. We welcome visitors. Pay us a visit during the spring and select from blooming plants.

Dahlia Culture

For the healthy growth and the lovely blooms your Dahlia planting should be expected to produce, just a few simple requirements are demanded. These are easy to understand and follow when we consider the manner in which the Dahlia plant grows.

The root division which we plant has an eye near or on the part of the stalk which forms the top of the root. This eye contains the really important part of the entire root, and from it a stalk and feed roots grow to form the Dahlia plant.

Azura

The rest of the root is merely a dinner basket to supply necessary nourishment for starting the new plant. As soon as the feed roots, very fine at first, reach the point where they start to supply enough plant food to enable the newly-formed leaves above ground to begin work, the original root has performed its purpose and may as well be disregarded. In proof of this, the root you plant may be cut in half or a still smaller portion be planted with a resultant vigorous plant, providing the conditions of soil and moisture, etc., are made right.

Thus the new plant needs nothing in the way of fertilizer or irrigation until the new feed roots are established. And the more numerous and faster-growing these feed roots, the stronger the plant and the better the

crop of roots for the next year. Any fertilizer should for this reason, not be placed in the hole in which the root is planted, but spread over the entire Dahlia plot, as the new roots will cover in most cases the entire space allotted to your Dahlias.

Some of these new roots will thicken and begin to store up starch and other food elements, forming the new crop of storage roots. It is when these are growing and the buds on the plant are beginning to open that plenty of plant food and water are necessary. It is known that one bloom in its formation requires many times the water and food that is needed for the foliage and stalk growth.

It is clear anything which tends to interfere with the growth of these new feed roots will stunt the growth of the plant, so an over-supply of water at the start, or the presence of rotting vegetation or manure, anything which will cause these roots to rot before they reach a healthy growth, is to be avoided. Plenty of room is needed for root development and space between plants should be enough for good ventilation to avoid mildew of the foliage.

With an understanding of these requirements, we can plan the best way to plant and care for the Dahlias. The soil should be loose and well drained. Spading deeply as soon as the ground can be worked in the spring is a necessary part of the preparation. On heavy clay soil some sort of humus should be worked in, and some sand or fine coal ashes. If new clay, a dressing of agricultural lime raked in the surface after spading will be of advantage. If the ground has been planted to a root crop the year before an application of bone meal and potash should be made, and this worked into the surface before planting. About five

pounds of bone meal and one pound of muriate or sulphate of potash to every ten plants.

When the soil has warmed up nicely, and not until then, is the time to plant. **Do not plant a Dahlia root in cold, wet ground**, and expect anything but failure. Some varieties may pull through, but nothing is gained by planting too early. A hole about five inches deep in heavy soil, to as deep as eight inches in light, sandy soil, is dug for each root, and allow at least three feet each way between holes. This for the large varieties. The Pompons may be spaced closer, also the miniatures for mass effects. A stake should be driven close to the hole and the root laid therein with the eye or sprout facing up, and toward the stake. The root should be covered about two inches, and the hole gradually filled in as the plant grows. It may be tied to the stake with soft twine or rag to avoid cutting the stalk.

For a bushy plant with numerous blooms the plant may be pinched out after the third set of leaves forms. This will force the buds at the base of the plant to develop and the plant will spread out. For large blooms, pinch out the buds on each branch down to the base buds, leaving only one bud to a stalk. This allows long stems for cutting or exhibition. As Pompons and Miniatures are somewhat valued in inverse ratio to their size, none of these should be disbudded, but the young plant may be pinched out to make more blooms.

There are a few insect pests which may infect your Dahlias, depending on your locality. Aphis or other sucking insects, or leaf hoppers or other chewing insects. There are a number of good sprays and dusts on the market, including DDT which may be used according to directions on the package. Your local feed store or hardware dealer will help you select whichever is indicated by your local conditions.

The ground around the Dahlia plants should be kept in a loose condition by frequent cultivation, deep at first and then shallower as the plant grows and the feed roots spread out, and near the surface. If your summer is very hot, a mulch between the Dahlias of grass clippings, or other material, will help keep the ground cool and avoid overheating the roots. During extreme heat it is advisable to pick off the buds and not allow blossoms to form, thus saving any possible dangerous wilting of the plant.

When watering, after the buds have started to open, and not until then, it is better to give the ground a thorough soaking once a week or every ten days, than to sprinkle the surface every day. The moisture should reach down about a foot to be of the most value.

Dahlia blooms should be cut either early in the morning before the sun starts to dry them out, or late in the evening. The best method of cutting for long keeping blooms, is to carry a bucket of cold water into the garden and plunge the stem of the Dahlia into it as soon as it is cut from the bush. A knife should be used instead of scissors, as the object is not to press the stem shut, but rather leave it so that it will absorb water readily for the bloom. The cut flowers should then be placed in the cold water container, in a cool darkplace, and away from any drafts, for several hours, or if cut in the evening, over night. After that they are ready for placing in your vase or other containers for display, and will keep much longer than if any other method of preparation is used. Too much foliage left on the stem will greatly lessen the keeping quality of the bloom.

After the first killing frost the Dahlia clumps should be dug and stored for the winter. In sections where there is no frost, or where it comes very late in the year, the plants may be cut down any time and after allowing a few days for the sap to go down into the roots, the clumps may be dug and cared for the same as if they had been killed by frost. It is well to dig the dirt away from the

clump and cut down with the spade all around it rather deep before lifting it out. This will cut the feed roots which may extend out as far as two feet from the stalk, and which might break some of the roots from the stalk if not cut. Any roots which are broken at the neck will probably not be any good the following spring.

The clump may be allowed to stand for a while to dry out the dirt, which may then be shaken off gently. Or a gentle stream of water may be used to wash the clumps. The stalks should then be cut off close to the clump, and it is then ready to be divided or stored.

A cool, not too dry, cellar is the best place for root storage, being sure it is frost proof. It does not need much below freezing to ruin Dahlia roots. Also dry warm air will cause the roots to dry out and shrivel up, so that most of them will not grow in the spring.

In dividing the clumps, all that is necessary is to have an eye for each root saved, and these eyes are plainly visible at the time of digging, if one wishes to divide them then. This will do away with the possibility of stem rot, which sometimes spoils the entire clumps. Cut surfaces may be dusted or dipped in powdered lime or sulphur and the roots packed in boxes of fine sawdust or even dry dirt. The name of the variety may be written on the root with an indelible pencil, moistening the surface so the writing will be permanent. This avoids the possibility of lost tags and mixed-up varieties.

Any special problems not covered will be gladly considered on request, and all available information thereto will be given.

Semi-Cactus

KEY TO TYPES

Applying to large or Exhibition type Dahlias and Miniatures, Miniatures being listed separately. Large type over 4 inches, Miniatures under 4 inches. Some "Ball" types in both size classes.

(FD)—Formal Decorative

(ID)—Informal Decorative

(C)—Straight Cactus

(IC)—Incurved Cactus

(SC)—Semi-Cactus

(Ball)—Ball, or Show type

Pompon Dahlias—A distinct type of petal formation in itself.

Our Own Dahlia Originations

Of which we have every reason to be proud and believe you will be to grow them

MOULIN ROUGE (SC)—Very vivid scarlet, showing an iridescent sheen in the sun. Has every quality one could wish for in a Dahlia except large size. It makes up for this in the multitude of blooms it produces, averaging 7 inches. Flower has the substance to enhance its lasting qualities both on and off the plant. Bloom carried on a long, heavy, ramrod like stem, supported by an exceptionally healthy, sturdy plant and root system. 5 to 6 feet in height (illustrated on front cover)\$2.50

RED WING (ID)—This one has all the characteristics of Moulin Rouge except the flower itself, being more of a subdued red. Petals curl and twist, creating a beautiful bloom. Flowers average 8 to 10 inches. Also, a profuse bloomer on a 5- to 6-foot bush.....\$2.50

LAVANCHEE (FD)—A rare blend of coloring hard to describe, being an exotic greenish yellow overcast light amaranth purple, creating a smoky tyrian rose effect. Large blooms of very good substance, up to 12 inches, carried on heavy, stiff stems. Outer petals quite often over 2 inches in width. Plant low branching and healthy, low to medium height, distinctive foliage \$2.50

FAYE (FD)—Petals somewhat pointed for a formal. The color, soft pink heavily overcast cerise. Not a large flower, but very productive of beautiful blooms. Good cut flower type. Plant is very healthy and easy to grow, wonderful root system. Blooms 5 to 6 inches; bush 5 feet..... 1.00

GENERAL LIST

Large Exhibition Dahlias

ADOLPH MAYER (SC)—Very dark red, almost black, from Holland, considered about the best of the black-reds.....\$1.00

ALICE HUME (FD)—Large blooms in soft buff shades, medium height and a profuse bloomer75

ALICE MAY (ID)—Large, pure white from Australia, very desirable75

ALICE McLEAN (SC)—Dark velvety red, silvery maroon reverse, a winner 1.50

ALL AMERICAN (SC)—Large, mulberry rose suffused salmon, wax yellow at base of florets, vigorous and profuse, medium height 1.00

ALTMARK (SC)—Lilac-pink shading to white at centers, early and productive, medium height75

ANGIE V. (FD)—Large, bright scarlet, almost ball shaped, medium height .50

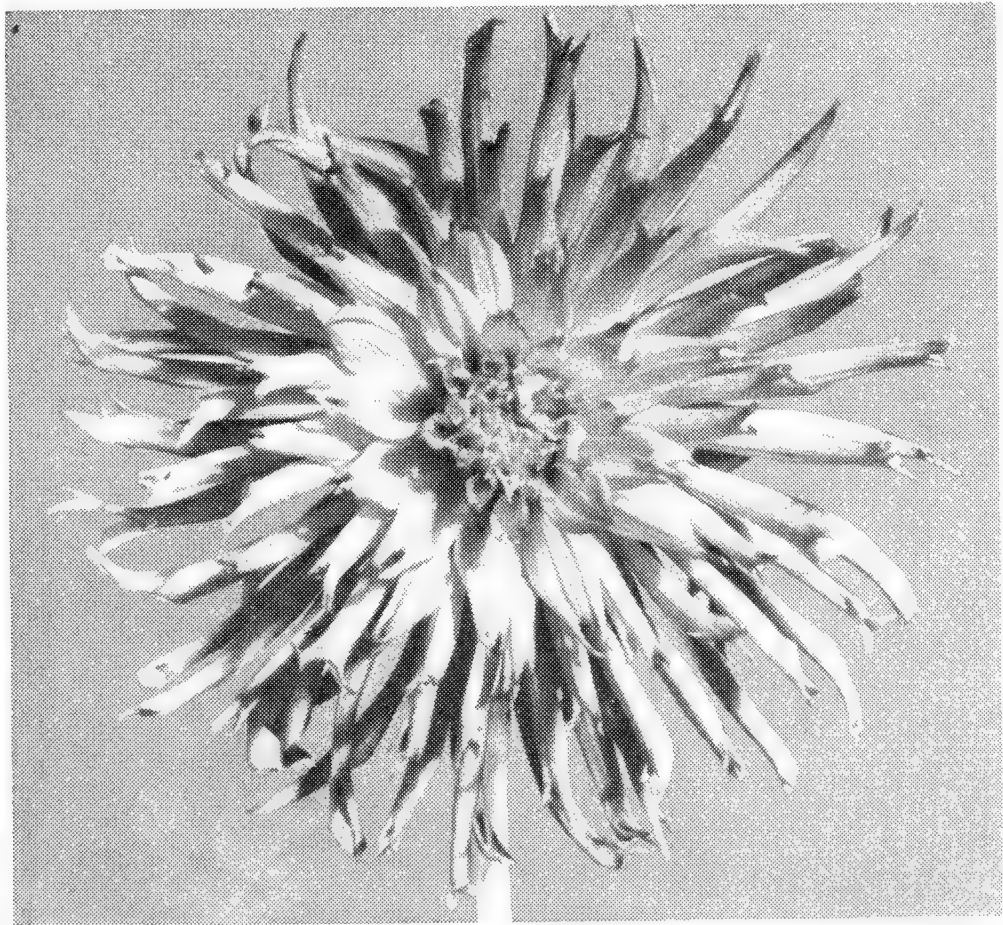

AZURA (ID)—Very large blooms of a glowing shade of deep lilac, bush tall and sturdy 1.00

BALLEGO'S GLORY (FD)—Mahogany-red, each petal edged in gold, very striking novelty and popular 1.00

BALLEGO'S SURPRISE (SC)—Beautifully formed blooms of pure white, hard to beat in this class, Ballego varieties are from Holland 1.00

BEAUTE (IC) —Another excellent one from Holland, nicely formed primrose yellow, very good for cut flower work	\$0.75
BEDFORD BEAUTY (IC) —Delicately formed petals of light amaranth pink shading to creamy white at centers, low bush, very productive	1.00
BERGER'S MASTERPIECE (C) —From Holland, Chamoix pink, slightly blended with other pastel shades, long stiff stems on medium height bush, very much in demand for both exhibition and cutting	1.25
BETTY HUBBARD (SC) —Clear deep yellow, good cutter and profuse bloomer on tall, sturdy plant75
BLUE HORIZON (ID) —Nice blooms of French lilac carried on a sturdy, extremely tall bush	1.00
BLUE RIVER (FD) —An old favorite, large bluish-mauve, medium to tall in height50
BRIGHT EMBERS (ID) —Blends of reds, gold and buff, distinctive petal formation, very profuse blooming on medium height plant	1.00
BRIGITTE WERNER (C) —Pastel rose-pink, long stemmed, excellent cut flower type	2.00
BRIOSO (SC) —Vivid scarlet evenly tipped white, attractive and productive	2.00
CALIFORNIA IDOL (ID) —Another old favorite, large, clear lemon yellow, low growing plant75
CHAS. L. MASTICK (FD) —Large and beautiful orange and amber-pink, novel petal formation and productive on low plant75
CLAIRE FLEETWOOD (ID) —Large blooms of soft orchid pink, vigorous and productive75
CLARA CARDER (ID) —Large, cyclamen pink, low growing, still one of the outstanding Dahlias of any color or type75
CLARA CLEMENS (FD or Ball) —A bi-color of garnet red evenly tipped white75
CLARIAM KELTON (ID) —Flame red blended with yellow and yellow reverse, petals curl and twist in a novel fashion, tall and productive	1.00
CORALLINA (SC) —From Holland, coral red and gold blended, very profuse on medium height bush50
CORAL LADY (IC) —Very popular example of the incurved cactus type, distinctive, deep coral color.....	1.50
CORNELIA B. PINCHOT (ID) —Immense, shaggy blooms of Burgundy red, strong healthy grower in every respect, one of our favorites75
CROWNING GLORY (IC) —Beautiful blend of rose-pink shading to cream at centers, great show winner	1.50
CROYDON GLORY (ID) —Extremely large blooms of lemon yellow, one of the very best Dahlias to come out of Australia	1.00
CROYDON LILAC (FD) —We are still looking for a better Dahlia than this one from Australia, a glowing shade of almost true lavender, wonderful growth characteristics, quite tall75

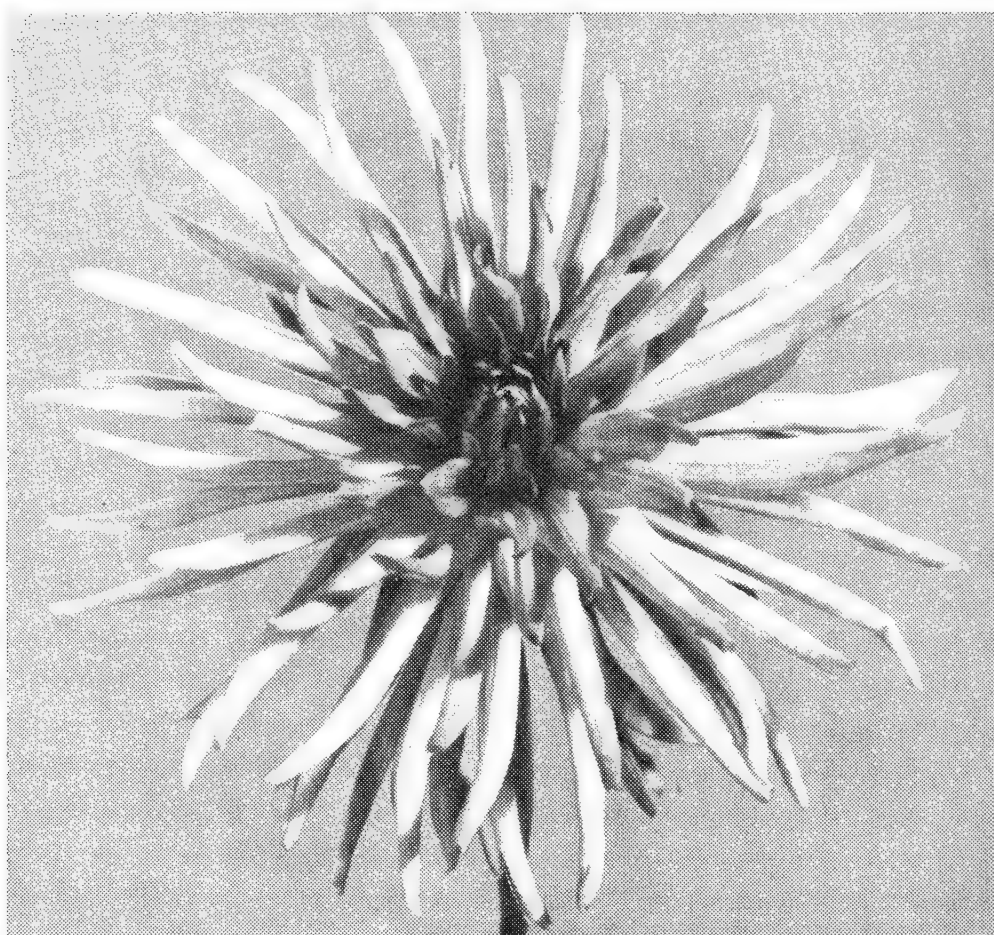

D'ARCY SAINSBURY (FD) —Another one from Australia without a peer in its color class, a large, creamy white, very much in demand both for exhibition and cut flower purposes, grows quite tall	\$0.75
D-DAY (FD) —True pink and one of the best cut flower types being grown	1.00
DEUIL DU ROI ALBERT (ID) —If you like bi-colors, you will like this one of Burgundy and white75
DIXIE'S WINE DOT (ID) —Extremely popular, variegated blooms of good size and growth characteristics, white splashed with Burgundy red, productive and of medium height	1.50
DOMINANT (IC) —An excellent cactus of rose-pink and lilac, trace of sulphur yellow at centers, medium height	1.00
EAGLE ROCK FANTASY (ID) —Large, clear orchid lavender	1.00
EHRENPREISS (C) —Glowing pink, a good cut flower type from Holland75
EL RUBIO (ID) —Large, outstanding blooms of ruby-red, much in demand....	1.50
FAITHFUL (SC) —Attractive pure white blooms on a tall, sturdy and very productive plant	1.00
FARNCOT (IC) —Dainty blooms of purple shading lighter into white at tips, low growing plant75
FIGARO (SC) —One of the most glamorous of Dahlias, very large blooms variegated bright yellow splashed with red, husky bush growth of medium height, a striking novelty and one of our favorites	1.50

Miss San Diego (see Page 11)

FLORISTS BEAUTY (FD) —A very good bi-color cut flower type, dark red evenly tipped white, tall and sturdy bush growth	\$1.00
FRANCIS LAROCCO (FD) —Profuse blooming, bright yellow cut flower type50
FREDA GEORGE (ID) —One of the most beautiful Dahlias to come out of Australia, delicately blended cream pink and lilac, keeps well when cut, medium height and a healthy grower	1.00
FREDA MONICH (ID) —Unusual color, mahogany with gold shadings, very attractive and popular with the public75
GAY KNIGHT (ID) —Extremely large blooms of red and yellow beautifully blended, plant growth vigorous and tall	2.50
GENERAL PERSHING (SC) —Novel colored blooms, variegated light tan striped and splashed violet, sturdy plant growth, medium height	1.00
GOLDEN ECLIPSE (FD) —Large flowered, pure gold, easy to grow50
GOLDEN STANDARD (C) —Bright gold with amber centers, strong and productive growth, quite tall75
GOVERNOR HEIL (C) —Orange, rose and autumn color delicately blended together to create a beautiful bloom, medium height50
GRAND SLAM (SC) —A bright shade of rose, or amaranth pink with citron yellow base, compact, sturdy bush growth, medium in height	1.00
GREATER GLORY (SC) —Large blooms of rose-pink, shading lighter, a big show winner, tall and husky plant growth	1.00
GREY DAWN (ID) —Well formed blooms of good size, white with orchid center, a very good Dahlia in every respect75
HELIOS (SC) —Another Hollander of merit, immense blooms of warm apricot with saffron yellow center	3.00
HILDA FIORETTI (ID to SC) —Delicately shaded deep rose-pink with apricot base and tips, productive and medium to low in height	1.00
HILLS SUPREME (ID) —Excellent cut flower type of clear deep rose pink....	.75
HOOSIER MARVEL (SC) —Large blooms, solid shade of bright yellow, a little late but worth the wait.....	1.00
JANE COWL (ID) —An old favorite, autumn shades with darker centers....	.50
JANE LAUSCHE (SC) —A large and beautiful combination of rosy mauve tipped pure white, one of the biggest show winners being grown and a must have with those who see it in bloom	2.00
JANINE (FD) —A lilac-rose of good size and growth characteristics50
JERSEY'S DAINTY (C) —One of the best cactus type whites75
JUANITA MONACHO (SC) —Very productive, wine colored cactus50
JUDY ANDERSON (SC) —Large maroon-red varying in degree of white at tips	1.00
JUSTRITE (FD) —Blend of creamy white suffused lavender-pink, you can't go wrong on this one of sturdy growth and medium height75

KENTUCKY SPORTSMAN (ID) —Large tri-color, lemon yellow, amber gold, tipped white, a striking novelty, low growing	\$0.75
KENTUCKY SUN (FD) —A good medium sized and productive yellow50
KIRSTEN FLAGSTAD (FD) —Huge blooms of a very rich shade of gold, tall open plant growth	1.25
LOIS WALCHER (FD) —Very attractive bi-color, pansy purple tipped pure white, low bush growth75
LORD OF AUTUMN (ID) —One of the great yellows, artistically formed blooms of immense size, a clear yellow, a big show winner	1.00
LYNN FONTANNE (SC) —Giant blooms of spectrum red, an exceptional favorite with the public for a number of years	1.50
MARGARET COLE (FD) —Attractive blend of lemon yellow and orange, tipped white, low growing and very productive50
MARK HEIDE (SC) —Medium sized blooms of pastel pink, petals twisting and curling, a good Dahlia from every standpoint	1.00
MARSHALL'S PINK (FD) —Good cut flower type pink, a competitor of the famous Jersey's Beauty, we like it better50
MARY LYNN DUDLEY (SC) —Large blooms, several shades of dark red, centers almost black, a very worthwhile Dahlia	1.50
MASCOTTE (IC) —Very striking petal formation, several shades of rose, slightly citron yellow at base, nice cut flower type	1.00
MAYOR FRANK OTIS (ID) —Autumn blends, one of the largest Dahlias in existence, tall growing and with lacy foliage.....	1.00
MICHIGAN RADIANCE (SC) —Golden yellow with bronze shadings, very good substance and prolific for cut flower purposes, medium height.....	1.00
MICHIGAN WHITE (SC) —Considered one of the best all around cut flower type whites in the country, open growing but produces a multitude of blooms on medium height bush	1.25
MISS ELSIE JANE (SC) —Beautiful blend of pink, violet-rose and cream, artistically curled petal formation, tall and profuse.....	.50
MISS SAN DIEGO (C) —One of the biggest show winners in the country, amaranth-pink blending to yellow centers, lacinated petal tips, very profuse blooming, medium height (see Page 9)	2.00
MME. C. JUSSANT (IC) —A French variety of bishops-violet, considered about the best in this color class, produces many blooms on a low growing plant, we like this one very much ourselves (see Page 12)	1.00
MOTHER'S DAY (ID) —About the largest of the pure whites and a winner from any standpoint, tall husky plant growth.....	1.00
MOTHER O' MINE (ID) —Immense pastel rose with gold suffusions, sturdy medium height plant	2.00
MOUNT WHITE HORSE (ID) —Another good all-purpose white, tall and healthy75

Mme. C. Jussiant (see Page 11)

- MRS. E. J. (C)**—Bright rose-pink, creamy white centers and tips, unexcelled as a cut flower and very prolific, medium height\$1.50
- MRS. E. HOWELL (ID)**—Mulberry rose with gold suffusions at base, medium height, not well known, but believe us, it's a swell Dahlia75
- MRS. ELLA WORTHEN (SC)**—Blends of salmon-rose, very large blooms, a little late, but a tall strong grower50
- MRS. GEO. LE BOUTILIER (ID)**—Giant blooms of carmine-red on low compact bush growth50
- MRS. GEO. PEZANT (IC)**—Beautifully formed blooms of medium-red, somewhat similar to the Dahlia Coral Lady, but darker 1.00
- MRS. HESTER PAPE (ID)**—Very large reddish-purple show Dahlia 1.50
- MRS. I. DE VER WARNER (FD)**—Lilac-rose, very productive for cutting50
- MRS. MINNIE RING (IC)**—Artistic blooms of light pink shading to cream yellow at centers, a very popular newer one, medium height 1.50
- MURPHY'S MASTERPIECE (ID)**—Very large, dark red, an old one, but still much in demand 1.00
- MUSTANG (SC)**—Giant Australian true pink cactus, another wonderful Dahlia from this country down under, you will like this one 2.00

NANCY ANN MITCHELL (IC) —Bright scarlet, one of the best in this class, medium height, open growth and many blooms	\$1.00
NANCY ROBINSON (ID) —Eosine pink with lighter shades, fairly small blooms with artistically shaped petal formation, swell for floral arrangements, tall and profuse of blooms75
OGDEN REID (FD) —Very large, pink blends creating a mauve or smoky rose effect, strong productive grower, medium height	1.00
ORANGE WONDER (C) —Prolific blooming Dahlia of almost solid orange....	1.00
PASADENA (FD) —Medium sized blooms of deep lavender-pink, tall, healthy and a profuse bloomer	1.00
PATTY WAUGH (ID) —Just a very good cut flower type white50
PFLAMENSPEIL (C) —Medium sized blooms of flame orange carried on a bush of excelelnt growth habits, you can't miss with this one if you like plenty of vivid color	1.00
PINK GIANT (ID) —Giant, shaggy blooms of tyrian-pink	1.00
POMEROYAL (FD) —Cream, shaded mauve-pink, good growth habits.....	1.00
POWERHOUSE—(ID) —Large raspberry-red with lighter stripings	1.00
PRIDE OF CALIFORNIA (FD) —Brilliant red and very productive50
PRINCE OF PERSIA (ID) —Large, vivid shade of red, well worth growing....	.50
RAY SMITH (SC) —Beautifully formed blooms of mallow purple, or dark lavender, one of our favorites, you can't miss with this one, medium tall and healthy bush growth	1.50
RED JERSEY'S BEAUTY (FD) —Brilliant red likeness of the famous Jersey's Beauty50
RED PILOT (FD) —Vivid carmine, well formed blooms in profusion, healthy bush growth, medium height, one of the best50
RHYTHM (IC) —Large blooms of rhodamine pink blending into primrose yellow at centers, nicely serrated tips, tall, strong bush	2.00
RITA BETTY (ID) —Large blooms of cinnamon and henna, very striking and desirable, medium in height	1.50
ROCKET SPRAY (SC) —Beautiful color combination, creamy yellow with bright cerise suffused into the base color75
ROCKLEY ORANGE (SC) —An orange cactus of good growth characteristics	1.00
ROUGE BOUQUET (C) —Orange and red blended into a beautiful cactus type Dahlia, medium height75
ROYAL PENNANT (FD) —Rich royal purple, exceptional color and blooms, there are too few good ones in this class50
RUBY TAYLOR (FD) —Very attractive, deep wine colored Dahlia50
RUFFLES (ID) —Beautiful rose-pink with salmon shadings, the extensive ruffled effect makes it almost a must have with those who have seen it in bloom in our gardens, tall healthy growth	1.50

SAGAMORE BEAUTY (FD) —Rich shades of pink and yellow cream delicately blended, good cut flower type	\$0.50
ST. THERESE (C) —Delicate pastel pink shading to white centers, one of the best cut flower types to come out of Holland	1.50
SALBACH'S WHITE (FD) —Good cutflower type white, very productive.....	.50
SANTA CLAUS (ID) —Scarlet and white tipped and overlaid yellow	1.00
SATAN (SC) —Large, scarlet with lighter reverse, one of the most glamorous of Dahlias75
SENSATION (C) —Lilac-rose cactus of very good habits	1.00
SHIEK (IC) —Still another very good one from Holland, pink with white centers and a faint lavender overlay, a florists delight and you will like it too, we are convinced of that.....	2.50
SHERWOOD'S PEACH (ID) —Giant blooms of orange and apricot blends, you can't go wrong with this one	1.00
SILVER GLAMOUR (ID) —Dark rose-purple edged in silver, a beauty	1.50
SILVER LADY (ID) —Pure white, lightly flushed violet-rose	1.00
THE COMMODORE (ID) —Vigorous growing, large flowered deep yellow....	.50
THE SENATOR (FD) —Pale canary yellow blended white, attractive and a good cut flower type	1.00
THE QUEEN (SC) —Exquisite blooms of Oriental pink	1.00
THISTLEDOWN (C) —Six-inch blooms of soft white with pale cream centers, profuse bloomer on a medium bush75
TOP FLIGHT (SC) —Glamorous blooms of bright blood-red	1.50
TOPS (SC) —Very large blooms of clear rich yellow, strong growing habits, low and compact, one of the best of the yellows	1.00
TOWN TOPIC (FD) —Deep purple bi-color, however, varying in degree of white at tips, some solid purple, tall and sturdy	1.00
VIRGINIA RUTE (SC) —Large blooms of deep blood-red, and excellent producer and show winner, even if an older variety	1.00
VOLGA RIVER (ID) —Vivid orange scarlet and yellow blend	1.00
WACHUNG GIANT (ID) —Rich gold, beautifully formed, and of strong growth50
WENOKA (FD) —Rosy mauve with magenta shadings, an excellent Dahlia50
WINE SPORT (ID) —Sport of Dixie's Wine Dot, same form, but solid wine red, has been very popular in our gardens this season	1.00
WM. H. HOGAN (ID) —Nicely formed bi-color of medium-red and white....	.75
YOUR LUCKY STAR (SC) —Nicely formed blooms of amaranth-pink shading to white centers75

Miniature Type Dahlias

These small replicas of their big cousins, the Exhibition types, are becoming more popular each year for their diversity of use, wonderful for cutting and arrangements, the ease with which they can be grown and the great quantities of flowers that most of them produce. They are classified for petal formation the same as the large types. Miniature Dahlias are those which normally produce flowers that do not exceed four inches in diameter, not including Pompons, which are classified separately.

ACE OF HEARTS (SC) —Nicely formed medium red, pointed petals, 2 ½ in., medium to low bush	\$0.50
ANDREA'S ORANGE (C) —Excellent, bright orange from Holland50
ANIMATO (SC) —Vivid pink with purple glow, Holland75
ARABESKE (SC) —A very choice sulphur yellow, Hollander75
BABY ROYAL (SC) —Several tones of salmon rose and gold35
BABY BLUE RIVER (FD) —Bluish mauve, very prolific, tall growing35
BABY SNOOKS (FD) —Bright yellow of very good form and habits, tall50
BARBARA DOANE (SC) —Very pretty blended soft pink and white, low growth35

Collections

We have come to the conclusion that most Dahlia fans would rather select their own from the many choice varieties herein described. However, here is a good buy for those, shall we say, beginners, or those who would like a nice assortment for color, type and size, but who do not care to take the time to study the complete catalog to place an order. We feel sure that you will be pleasantly surprised at the results you will get from this collection.

5 LARGE EXHIBITION TYPE 5 MINIATURES 5 POMPONS

15 first quality roots of a much higher catalog value, all different, named varieties, a very good range of colors

All for \$5.00

TOM THUMB —Very small bright red35
TONY —Good medium yellow35
YELLOW GEM —Practically the standard for yellow pom35

We suggest that you save this catalog for reference to cultural directions and handling problems prior to planting.

A Few Simple Rules for Gladiolus Culture

They do best in full sun and must have at least a half-day when the sun can reach them for best results.

Any good garden soil will grow Glads. Rotted manure is desirable at the bottom of hole with a little dirt between this and the bulb. A side dressing of commercial fertilizer (3-10-10) at planting time is, quite often, very beneficial.

Plant 5 or 6 inches deep, spacing them so they are approximately 4 inches apart in the row.

After the plants have their fourth leaf they should be kept well watered until the florets are open.

Keep well cultivated and weeded, the more the better.

Use a good insecticide spray every two or three weeks from the time the Glads start to grow to control their worst enemy, the Gladiolus thrip. This is important where the pest is prevalent. It is a very good idea to soak bulbs before planting. Soak four hours in a solution of one tablespoonful of Lysol to one gallon of water.

Here's hoping you get as much pleasure out of growing Glads and Dahlias as we do and by providing you with nothing but the highest quality stock, at reasonable prices, that we can continue to supply you with glamorous flowers.

Gladiolus Bulbs

We are offering, with pride, what we consider are the outstanding varieties in each basic color range and reasonably priced for the average home gardener. We know of no better quality Glads grown anywhere than those grown in this, the Puget Sound area of Washington. We are not pricing them according to size as they will be all No. 1 blooming size. Please write for quotations in quantity lots, or, for varieties not listed in this catalog. Same terms and shipping conditions apply as those on Dahlias.
